

# WHITEPAPER

//

Eros burns with such intense love that in the future, only one token will remain.

BURN BABY BURN !!

# What is EROS

- **Mathematically designed for burning and passive income**
- **100% Full Love:** Free Airdrop for TitanX liquid token holders.
- **Decentralization and Autonomy:** EROS is the pinnacle of independence, driven by mathematics, with a love for freedom.
- **Hyper-Deflationary:** With each transaction, EROS becomes scarcer and more desirable. Just like true love.
- **Token Supply:** A predetermined amount of 333,333,333,333 EROS, because love knows no bounds... but tokens do.

# What sets us apart?

- **Unlimited Staking:** See Staking section for breakdown.
- **Profits from market transfers:** Feel the love (and profits) with every market transaction.
- **Earning from arbitrage bots:** stealing pretty girls from friends

# Everything you need to know in a nutshell

We won't bore you with long whitepapers. Here it's all about facts!

- 0% to Treasury
- 0% to DAO
- 0% to the team
- 100% to the project participants
- dAPP: <https://www.erosrevival.win>
- Network: PulseChain
- Contract Address - 0x0f1b7cffc37547c5d189b08f255b60aa394c62cf
- Liquidity Pool: WPLS/EROS - 0xf416be3434edc01ad704b86f32cb8d0fbf22d1f2
- Total EROS tokens: 333,333,333,333
- NO admin keys, liquidity pool owned by the smart contract
- **Transfer Tax:** A 5% tax is applied to each transaction and is distributed with love as follows:
  - 2% burn EROS tokens
  - 1% staking EROS (paid out without additional inflation)
  - 1% temporary locking of staked EROS (paid out without additional inflation)
  - 1% adding additional liquidity to the WPLS/EROS pair
  - To buy EROS set your slippage to 6% to cover these distributions.

# Staking

- You can stake your EROS tokens and withdraw them at any time.
- Staked tokens remain in your wallet because EROS loves you and wants to be with you.
- Stake and unstake your EROS whenever you want.
- Lock your EROS for a specific time, only if you want to!: Engage your EROS for longer, earn more from staking - it's like a longer date that pays off better.
- Stake - Earn 1% from pool.
- Stake & Lock - Earn 2% from pool.
- End stake at anytime - Pay 1% (This is distributed to other stakers).
- End Lock early - Pay 17% (This is distributed to other lockers). See Locking section for breakdown.

# Locking your stake

You can extend your relationship by locking tokens for a minimum of 90 days, up to 10 years. Ending the relationship early (unlocking your tokens before committed time) incurs a 17% penalty which is added to the Locking reward pool.

If you lock your tokens, you receive additional passive income from the pool of locked tokens, distributed in the following percentage breakdown:

- Level 1 - Decade's Infatuation - 9-10 years (lock-in period) earns 100% of the reward.
- Level 2 - Long-Term Commitment - 8-9 years (lock-in period) earns 95% of the reward.
- Level 3 - Steady Relationship - 7-8 years (lock-in period) earns 90% of the reward.
- Level 4 - Solid Partnership - 6-7 years (lock-in period) earns 85% of the reward.
- Level 5 - Passionate Love - 5-6 years (lock-in period) earns 80% of the reward.
- Level 6 - Serious Dating - 4-5 years (lock-in period) earns 75% of the reward.
- Level 7 - Committed Interest - 3-4 years (lock-in period) earns 70% of the reward.
- Level 8 - Future Flirting - 2-3 years (lock-in period) earns 65% of the reward.
- Level 9 - Blossoming Feelings - 1-2 years (lock-in period) earns 60% of the reward.
- Level 10 - Summer Fling - 90 days-1 year (lock-in period) earns 55% of the reward.

## Examples of rewards for staking & locking

- The reward pools grow through volume on the protocol - The 5% tax distributes 1% to staking pool and 1% to locking pool. Stakers & Lockers can see their reward balance grow and claim at anytime.

When the lock period ends, you can still have your tokens locked and continue accumulating rewards without any consequences.

Note - 100% of the 17% early unlock fee benefits the lockers and protocol buy burning any unallocated rewards (See examples below).

### Example 1:

User "Cupid" earned 10,000,000 (EROS) because another user ended their lock and unlocked tokens early. Cupid is at the fifth level and receives 80% of the reward, which is 8,000,000 (EROS) ready for collection. The remaining 2,000,000 (EROS) are burned and will never re-enter circulation.

### Example 2:

User "Romeo" earned 10,000,000 (EROS) for another user ending their engagement early. Romeo is at the second level and receives 95% of the reward, which is 9,500,000 (EROS). The remaining 500,000 (EROS) are sent to the address for unrequited love and burned.

- 1% of tax fees are allocated for the continuous addition of liquidity pools by the smart contract to ensure your profits are as stable over time as love.
- **Earning from arbitrage bots:** Other tokens with various liquidity pairs associated with EROS will be added to the project to further profit from arbitrage bots.

# WHATS NEXT?

- Introducing EROX – Bigger, Better, Stronger
- EROX Minting protocol – Coming Soon
